

# After School Classes

## Why choose us?

- Fun
- Educational
- Hands-On

## Theme:

## Space Explorers

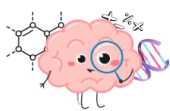

During the STE(A)M Space Explorers session, our young astronauts will launch a rocket into space, learn about moon phases, make models of planets, constellations, solar eclipses, moon craters and more. We will learn about kinetic energy, gravity, force, trajectory, acceleration, velocity, hemispheres, force, shock, absorption, orbits and so much more. We will discover how these forces shape the world around us!

### Science Classes for Kids

- Kids will explore the connections between science, technology, and the arts
- Learn through hands-on experimentation and real-world applications of scientific concepts
- Prepare for the future by developing critical thinking and problem-solving skills

### What We Teach

Scientific Reasoning

Teamwork

Planning & Visualization
